

Presentation

Upon completing your research, you and your group will decide how you want to present your topic to the class. Ideas for your presentation may include: videos, infomercials, skits, brochures, powerpoints, or any other ideas approved by me. Be sure to include photographs, diagrams, charts, graphs, flow charts, and stories of people who are working with your alternative resources to persuade the class why your energy resource can save the country. You will have two class periods to prepare for your presentation.

Energy Resources Rubric

	5	4	3	2	1	0
<u>resentation</u>	Creative, clear and thoroughly covers topic	clear and thoroughly covers topic	Somewhat creative and clear	Presentation is not very clear or creative	Unthoughtful presentation	Did not present
<u>esearch</u>	Information is very detailed/the group knows their topic very well	Information is detailed in the group knows their topic well	Information is somewhat detailed and the group knows their topic well enough to present	Need more information/the group seems unsure of their topic	Very low amount of facts and information/the group does not know their topic well	Did no research
<u>ooperation</u>	Group worked very well together/finished on time	Group mostly worked well together/finished on time	Group had some issues/finished on time	Group did not work well together/finished on time	Group did not work well together/did not finish on time	Did not finish project/group was separate d
