

Before making the assignment, students have read about the water cycle, viewed a video, and listed the steps of the process in their notes and listed the steps of the process in their notes.

## Water Cycle

Choice of activity: Cartoon, an individual project, skit, or rap.. The rap can be done alone or with a group. Other ideas can be presented, just check with me first.

### Requirements:

Include the terms, or a form of the terms: evaporate, condense, participate, transpiration.

Sequence is correct.

Process is clearly illustrated and easy to understand.

### Revisions:

Add a "What if" section at the end changing the circumstances.

Examples :

What if there was a drought?

What if it rained for 3 days?

What if there was a hurricane?

Students work through the Gizmo activity dealing with the water cycle.
